

Zero 360 4.5kg Armoured Vehicle Zero ZONE Automatic Extinguisher System

Zero 360 represents over five years research and development, producing a major step forward in vehicle on-board safety. This Lifeline Zero 360 system contains 4.5kg of gaseous extinguishant activated by multiple Zero ZONE heat detectors and discharging through specially designed high-performance nozzles. Performing in a similar way to the now banned Halon (BCF) systems **Zero 360** has been approved by the FIA for use in international motorsport and is already selected by the majority of world championship winning teams.

Significantly smaller and lighter than many current alternatives **Zero 360** offers far better packaging within the confines of the modern fighting vehicle with improved fire suppression performance.

Zero 360 combines stored pressure with our compression discharge technology to discharge in any orientation in a very effective and consistent spray pattern. Lifeline uses only the finest quality components both in the unit and the installation kit supplied with each system.

- Specially designed and selected for military and armoured vehicles
- Lightweight and compact
- 4.5kg of gaseous extinguishant in standard unit
- Zero ZONE heat detectors
- High-performance nozzles
- Clean 3M™ Novec™ 1230 liquid, Halon replacement, environmentally acceptable
- Highest quality components, Defence Standards tested
- Constant discharge in any cylinder orientation
- Excellent fire knock down and fire out capabilities
- Option for ballistic protection jacket
- Two year service cycle
- Based on our successful FIA Approved systems
- Lifeline - the choice of world championship winning constructors

Specifications

Description:	Zero 360 4.5kg Automatic Zero ZONE Extinguisher System
Contents:	3M™ Novec™ 1230 liquid, pressurised
Discharge System:	Stored pressure (Nitrogen)
Power Requirements:	None.
Cylinder Construction:	Aluminium Alloy (DOT)
Cylinder Size:	134mm dia x 440mm (excluding bracket & ballistic jacket)
Weights:	Cylinder: 5.5kg (filled)
	Zero ZONE Detector: 190g

Typical Installation
