

ARMoured BRAKE SYSTEM NISSAN PATROL (Y62)

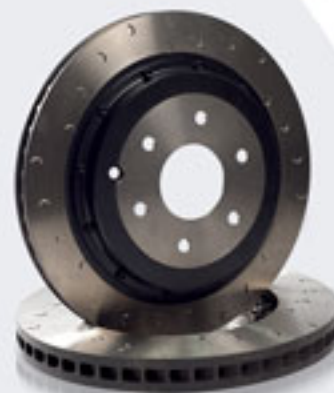

INFINITY QX 80

ARMoured VEHICLE BRAKE SOLUTIONS

Key Features

- Reduced stopping distances
- Elimination of brake fade in nearly all conditions
- Optimum stability under extreme braking
- Increased service life of pads and rotors
- Fully compatible with Nissan OE ABS and EBD systems
- Suitable for vehicles with GVW up to 6,300 Kgs

Specifications

Armoured Specification Calipers

- Front - 6 x 44 mm pistons per
- Rear - 4 x 35 mm pistons per *

Armoured Specification Disc Rotors

- Front - 370 x 36 mm
- Rear - 370 x 28 mm *

Heavy Duty Brake Pads & Hoses

- High performance brake pads with +60% surface area
- Goodridge steel brake hoses

* Note Front axle kit includes MSW Armoured compound OE shape rear pads. Rear axle kit is optional for extreme applications.

ARMoured VEHICLE BRAKE SOLUTIONS

The difference between stopping
and not stopping!

Alcon Brake solutions are **application specific** and engineered to ensure harmony with all OE electrical systems and fluid capacities.

Unparalleled Test Results

- Stopping distances reduced by over 25% with the same amount of pedal effort
- Consistent stopping distances over repeated deceleration events
- Zero brake fade reported
- Stability of vehicle retained throughout the test

(Above results recorded for vehicle with GVW of 5,200 Kgs during 20 back to back 100 Kph to 0 Kph stops.)

Also available from **MSW Armoured**:

- OE Shape Brake Pad and Disc Upgrades
- Fire Suppression Systems
- Heavy Duty TUV approved Alloy Rims
- Run Flats, Tyres & TPMS (Tyre pressure monitoring systems)
- Heavy Duty suspension components
- Utility seating
- Winches
