

# ARMoured BRAKE SYSTEM TOYOTA LC200 LEXUS LX570

## ARMoured VEHICLE BRAKE SOLUTIONS

### Key Features

- Reduced stopping distances
- Elimination of brake fade in nearly all conditions
- Optimum stability under extreme braking
- Increased service life of pads and rotors
- Fully compatible with Toyota OE ABS and EBD systems
- Suitable for vehicles with GVW up to 6,300 Kgs

### Specifications

#### Armoured Specification Calipers

- Front - 6 x 41 mm pistons
- Rear - 4 x 35 mm pistons

#### Armoured Specification Disc Rotors

- Front - 355 x 36 mm
- Rear - 370 x 28 mm

#### Heavy Duty Brake Pads & Hoses

- High performance brake pads with +60% surface area
- Goodridge steel brake hoses

# ARMoured VEHICLE BRAKE SOLUTIONS

The difference between stopping  
and not stopping!

Alcon Brake solutions are **application specific** and engineered to ensure harmony with all OE electrical systems and fluid capacities.

## Unparalleled Test Results

- Stopping distances reduced by over 25% with the same amount of pedal effort
- Consistent stopping distances over repeated deceleration events
- Zero brake fade reported
- Stability of vehicle retained throughout the test

*(Above results recorded for vehicle with GVW of 5,200 Kgs during 20 back to back 100 Kph to 0 Kph stops.)*

## Also available from **MSW Armoured**:

- OE Shape Brake Pad and Disc Upgrades
- Fire Suppression Systems
- Heavy Duty TUV approved Alloy Rims
- Run Flats, Tyres & TPMS (Tyre pressure monitoring systems)
- Heavy Duty suspension components
- Utility seating
- Winches
